Objective

I'm a career changer. I've been working in the same place for 18 years, had two vacations for childcare during that time. Two years ago I tried programming. Fell in love with coding and Ruby and now get acquainted with Rails. Certainly, my goal is web developing. That's why I'll be happy to find a job in a friendly to beginners team. I'm highly motivated and hardworking person, able for thinking outside the box, responsible, communicative, like to share my knowledge and experience. I can become a strong member of your team in course of some time.
